

Dual NPN Digital Transistors

HBC114YC6

Features

- Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit).
- The bias resistors consist of thin-film resistors with complete isolation to allow negative biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
- Only the on/off conditions need to be set for operation, making device design easy.
- Two DTC114Y chips in a SOT-563 package.
- Mounting by SOT-523 automatic mounting machines is possible.
- Mounting cost and area can be cut in half.
- Complements the HBA114YC6
- Pb-free package.
