Description

The MTNN8453KQ8 uses advanced trench technology to provide excellent $R_{DS(on)}$ and low gate charge. The two MOSFETs make a compact and efficient switch and synchronous rectifier combination for use in DC-DC converters. A Schottky diode in parallel with the synchronous MOSFET to boost efficiency further.
The SOP-8 package is universally preferred for all commercial-industrial surface mount applications.

Features

- Simple drive requirement
- Low on-resistance
- Fast switching speed
- Pb-free lead plating and halogen-free package
