

DMS3012SFG

# 30V N-CHANNEL ENHANCEMENT MODE MOSFET WITH SCHOTTKY DIODE POWERDI®

#### **Product Summary**

| V <sub>(BR)DSS</sub> | R <sub>DS(ON)</sub>                 | Package | I <sub>D</sub><br>T <sub>A</sub> = +25°C |
|----------------------|-------------------------------------|---------|--|
| 650V                 | 10mΩ @ V <sub>GS</sub> = 10V POWERI |         | 12A                                      |
| 6507                 | 15mΩ @ $V_{GS} = 4.5V$              | 3333-8  | 9.5A                                     |

#### **Description**

This MOSFET has been designed to minimize the on-state resistance  $(R_{DS(on)})$  and yet maintain superior switching performance, making it ideal for high efficiency power management applications.

#### **Applications**

- Backlighting
- Power Management Functions
- DC-DC Converters

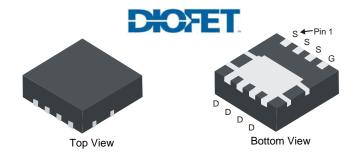

#### **Features**

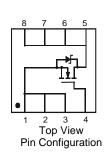

- DIOFET utilizes a unique patented process to monolithically integrate a MOSFET and a Schottky in a single die to deliver:
  - Low R<sub>DS(ON)</sub> minimize conduction losses
  - Low V<sub>SD</sub> reducing the losses due to body diode conduction
  - Low Q<sub>rr</sub> lower Q<sub>rr</sub> of the integrated Schottky reduces body diode switching losses
  - Low gate capacitance (Q<sub>g</sub>/Q<sub>gs</sub>) ratio reduces risk of shoot through or cross conduction currents at high frequencies
- Small form factor thermally efficient package enables higher density end products
- Occupies just 33% of the board area occupied by SO-8 enabling smaller end product
- 100% UIS (Avalanche) rated
- 100% Ra tested
- Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)
- Halogen and Antimony Free. "Green" Device (Note 3)
- Qualified to AEC-Q101 Standards for High Reliability

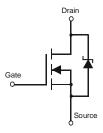

#### **Mechanical Data**

- Case: POWERDI3333-8
- Case Material: Molded Plastic, "Green" Molding Compound. UL Flammability Classification Rating 94V-0
- Moisture Sensitivity: Level 1 per J-STD-020
- Terminal Connections Indicator: See diagram
   Terminals: Finish Matte Tin annealed over Copper leadframe.

  Solderable per MIL-STD-202, Method 208
- Weight: 0.072 grams (approximate)

Internal Schematic

### **Ordering Information** (Note 4)

| Part Number   | Case          | Packaging        |
|---------------|---------------|------------------|
| DMS3012SFG-7  | POWERDI3333-8 | 2000/Tape & Reel |
| DMS3012SFG-13 | POWERDI3333-8 | 3000/Tape & Reel |

Notes:

- 1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS) & 2011/65/EU (RoHS 2) compliant.
- 2. See http://www.diodes.com for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
- 3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.
- 4. For packaging details, go to our website at http://www.diodes.com.

### **Marking Information**

N12 = Product Type Marking Code YYWW = Date Code Marking YY = Last digit of year (ex: 11 = 2011) WW = Week code (01 ~ 53)

### **Maximum Ratings** (@T<sub>A</sub> = +25°C, unless otherwise specified.)

| Characteristic   | Symbol           | Value  | Units            |              |    |
|--|------------------|--|------------------|--------------|----|

| Total Power Dissipation (Note 6)                 | T <sub>A</sub> = +25°C | р               | 2.2   | W    |
| Total Fower Dissipation (Note 0)                 | $T_A = +70^{\circ}C$   | $P_{D}$         | 1.3   |      |
| Thermal Resistance, Junction to Ambient (Note 6) | Steady State           | <u> </u>        | 58    | °C/W |
| Thermal Resistance, Junction to Ambient (Note 6) | t < 10s                | $R_{\theta JA}$ | 31    |      |
| Thermal Resistance, Junction to Case (Note 6)    |                        | $R_{\theta JC}$ | 11    |      |
| Operating and Storage Temperature Range          | $T_{J_i}T_{STG}$       | -55 to +150     | °C    |      |

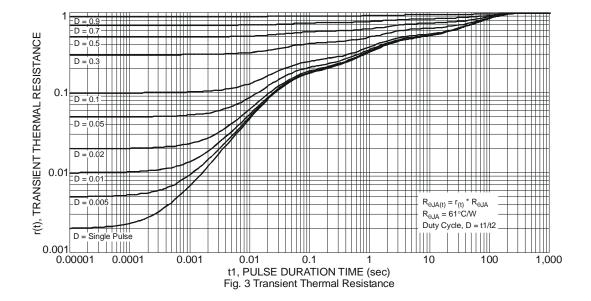

Notes:

- 5. Device mounted on FR-4 substrate PC board, 2oz copper, with minimum recommended pad layout. 6. Device mounted on FR-4 substrate PC board, 2oz copper, with 1inch square copper plate. 7.  $I_{AR}$  and  $E_{AR}$  rating are based on low frequency and duty cycles to keep  $T_J$  = +25°C

Diodes Incorporated and its subsidiaries reserve the right to make modifications, enhancements, improvements, corrections or other changes without further notice to this document and any product described herein. Diodes Incorporated does not assume any liability arising out of the application or use of this document or any product described herein; neither does Diodes Incorporated convey any license under its patent or trademark rights, nor the rights of others. Any Customer or user of this document or products described herein in such applications shall assume all risks of such use and will agree to hold Diodes Incorporated and all the companies whose products are represented on Diodes Incorporated website, harmless against all damages.

Diodes Incorporated does not warrant or accept any liability whatsoever in respect of any products purchased through unauthorized sales channel. Should Customers purchase or use Diodes Incorporated products for any unintended or unauthorized application, Customers shall indemnify and hold Diodes Incorporated and its representatives harmless against all claims, damages, expenses, and attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized application.

Products described herein may be covered by one or more United States, international or foreign patents pending. Product names and markings noted herein may also be covered by one or more United States, international or foreign trademarks.

#### LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

- A. Life support devices or systems are devices or systems which:
  - 1. are intended to implant into the body, or
  - 2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.
- B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
