Description

AP2762 series are specially designed as main switching devices for universal 90~265VAC off-line AC/DC converter applications. It provide high blocking voltage to overcome voltage surge and sag in the toughest power system with the best combination of fast switching design and cost-effectiveness.

The TO-220CFM package is widely preferred for all commercial-industrial through hole applications. The mold compound provides a high isolation voltage capability and low thermal resistance between the tab and the external heat-sink.
