

## Bias Resistor Transistor

### PNP Silicon Surface Mount Transistor with Monolithic Bias Resistor Network

**LDTB123EET1G**

- Applications

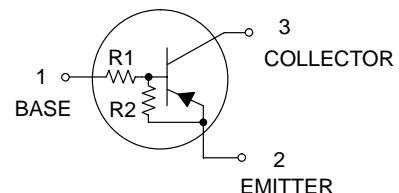

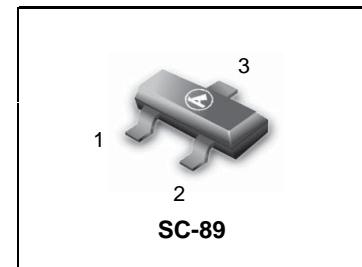

Inverter, Interface, Driver

- Features

- 1) Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit).
  - 2) The bias resistors consist of thin-film resistors with complete isolation to allow positive biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
  - 3) Only the on / off conditions need to be set for operation, making the device design easy.
- We declare that the material of product compliance with RoHS requirements.
